PROFILE

I'm a motivated developer with one year and eight months of experience working as a java and react js developer.

As a front-end lover, I'm a self-driven learner of front-end frameworks. I spend my free time working in my open source projects. I'm always trying to push my self out of my comfort zone by learning new technologies and I always keep maintenance as well as quality in everything I do.

Currently finishing my Computer System Analyst Degree at Universidad de la Republica, Montevideo, Uruguay.

EMPLOYMENT HISTORY

Software Developer, Integradoc
Montevideo, Uruguay
Apr 2018 — Dec 2019

Integradoc is a company focused on document-based Business Process Management (BPM), electronic documents and e-Government. It's an innovative document management software that allows modeling document-based business processes, automate and analyze them for improvement.

Tasks performed:

· Front-end and back-end development.
· Web services for communication between systems.
· Develop custom solutions for clients with demanding deadlines.
· Code maintenance and bug-fixing.
· Designer and developer of a new web application for electronic notifications (e-Notifications). Communication via web services between systems. Focused on front-end development. (JSF Primefaces and JAVA Rest Web Services)
· Designer and developer of the front-end of a new web application (My notices). Communication via web services rest with the back-end.(ReactJs, Redux, JAVA MicroServices)

EDUCATION

Computer System Analyst, Universidad de la Republica
Montevideo, Uruguay
Mar 2013

Degree of Computer System Analyst gives you enough math and logic knowledge that keeps you think in an analytical way and self-driven, building everything with quality and effectiveness.
